

Easter. 2007

Suggestion for next year - simplified music til 4am is not a good idea. Drumming is fine but not doof doof. Everyone around fire circle 9 agrees. - Cheryl.

Complaint - I was awake till 4am because the people at the gypsy ^(drumming stage) kitchen decided to play very loud & annoying music. I am very upset because this is not what I expect from confest. Drumming is great, but they were completely drowned out by the techno. If you expect people to bring headphones so we don't bother people with our music, we expect you to do the same - Thankyou, Sharon.

Another complaint about music on Fri @ the stage. The people of Fire circle 5 were all in agreement of the negative impact of loud recorded music at confest. We feel it polarizes music preference of confesters to the DJ's own personal choice. And what's with what's going to happen on Sunday night...??
Pog & Dub ... what? - Rosko

Easter 2007

I would just like to mention that the music on Friday nite was way too loud, and went way too late.

I thought that we weren't allowed to have amplified music, so I was surprised to hear that. It became like a trance nightclub or something that I would not appreciate at all. The drumming is fine, but once you start playing whatever you want all nite then it gets abit much.

Thankyou.

The ~~electronic~~ ^{amplified} music is on very late when there's no one dancing. If there's no one dancing maybe the music could be turned off if it's so late at night thank you.

No amplified music would be fantastic. Drumming is fantastic. Too much coming from the stage area. Thanks guys.

Amplified music - please stop this. It does not feel good here at confest, is too loud & to late. Drumming is lovely but electronic sound is not.

- After 2007
Suggestion - If you want to do Techno
put the stage in the field facing away
from people trying to sleep.
Otherwise Thanks a lot for the festival
Comedy Tent + Kitchens are great.
- Chris

Confest = Spirt, Love, Drums.

Earthcore = ~~Let~~ Techno Music till dawn.

Please keep the loud music out of Confest.
- Gary

Please keep it amplification
FREE ♡♡♡

- Amplification free & lets all
live here. We love it here.
X X X X X X

Amplified music could be handled
better: further away or quiete-system.
Happy to have it ~~as it~~ after all as
an inclusive society we have to work
out away otherwise who's next. to be
banned.
wants.

April 2007

Another complaint / comment on the amplified music - Confest is (has been) the last family friendly festival in existence. There is no need to turn it into every other loud music festival there is. Please keep confest special & amplified music free. Or at least turn it right down. It has been an unnecessary part of confest this year. Please keep Confest family friendly - We need sleep. 

Been a lovely confest only concerns I have is the amplified doof music it was meant to be a concert area with live music not doof if people want doof they can go to earthcare also am concerned about all the yuppies that are now coming they are selfish have no idea of the confest alternative life

Easter 2007

style in the old days they
would come then get scared
off & have is contest becoming
commmerical? I hope not, also
need more trolleys & maybe
signs saying please return
trolleys to say into tent
encourage people to think of
others. The drumming was
fantastic! good to see the
drumming sounding so good I
love going to sleep to it :
& some fantastic fire twirling
too just concerned parents
aren't watching their children
& there are no fire blankets
around for safety.

We loved contest, thank you so much for all the
hard work many quiet workers behind the scenes
must have done to make this happen.

Would it be possible to have some toilets near
Buss kitchen and the massage tent. Also I understand
there is a 2-4 curfew for the drumming perhaps

EASTER 2007

to encourage this to be enforced you could tape the drummers and then play them back to themselves when they finally crash in their tents between 4+6 every morning... This may help them understand why they need to stop earlier (ps no malicious intent)
